## Production and Specialized Machinery

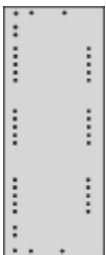

2100 x 760 mm

650 x 300 mm

910 x 760 mm

1000 x 600 mm

### QUESTION:

Which machine can do these 4 panels in the same sequence in less than 60 seconds ?

### ANSWER:

The Alberti Vector CN

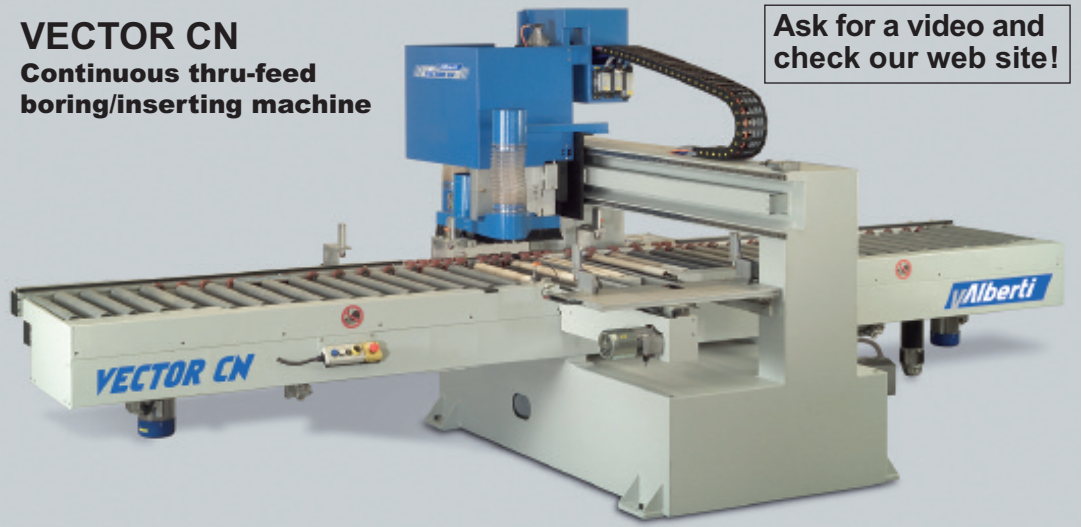

Even better, it can also install hardware such as: hinge plates, drawer slides and various k-d fittings

In terms of flexibility for boring and hardware insertion, Alberti are recognized as world leaders, here is why:

- Absolutely no table set up thanks to the suction cup clamping and moving system.
- 100% capacity to work in a sequence, pieces of different sizes with different machining characteristics.
- High movement and machining speeds with the latest brushless motors and control technology; works from work lists or bar code right on the parts.
- Possibilities to insert various hardware, most of the time without making the cycle longer.
- Modular concept; easy to integrate to any line.

### VECTOR CN

Continuous thru-feed boring/inserting machine
