Production and Specialized Machinery

MB
MB Masc. GmbH
Roba - Tech

For solid wood and MDF doors, you need the 360° rotational head for uniform processing on the 4 edges

Rotation 360° - Patented system !

Important advantages :

- Consistent sanding results, specially for corner breaking of internal and external edges.
- Better, more even result with stains, significantly reducing the need to «match» shades.

Roba - Belt
For components and mouldings

Modular machine with a large choice of configurations. Eliminate knife marks for a superior finish.

MB-Flex quick insertion brush system.

In stock for demo
See the video on our web site

INVITATION!

OCTOBER 27-29 Booth # 1339

New location - Direct Energy Center - Toronto
Check www.woodworkingexpo.ca for info + map

Balestrini

The most popular system in the industry for 5-piece MDF wrapped doors

Pro MD/2

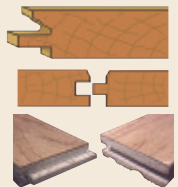

CNC Systems for 45° mitered doors with tenon mortice assembly

- Combines tenoning and morticing in one machine.
- Fast set-up changes with PC and touch screen.
- Anti-splintering cycle for perfect results on solid wood as well as wrapped MDF.

C-1203 / C-1205
Coping / end matching system

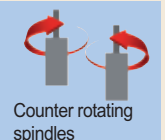

PMK
SYSTEMS

Perfect results without chipping, blow-out or splintering !

- No back-up piece or chip breaker required.
- Possibility to work with stacked tooling.
- Cycle time 4 to 10 seconds (adjustable).
- Linear rails (THK style) insure proper alignment of the table to the cutter heads which are fixed.

Counter rotating spindles

Problems finding qualified help ? Invest in technology !

F45 Perform The «intelligent» saw

Much more than only motorized axes !

- Eye level control: can store 20 set-ups.
- Functions such as: grooving, incremental dimensions, bevel rip.
- Easy axis calibration in 3 simple steps.
- Crosscut mitre fence for angles from 0 to 49° with length compensation.
- Motorized rip fence: the control calculates automatically correct fence position when blade is tilted.
- USB interface for software up dates.
- On/off switches at the end of the carriage.
- Rapido scoring with shim-less system.

WA6

Well equipped and affordable.

WA8

Altendorf quality at reasonable cost.

CEHISA Automatic edgbanding machines

PRO-9
Now available with guillotine
for 3 mm PVC / ABS !

BRYKO

The new entry level
edgbander for the small shop !
With hot melt glue pot

4 Stations: end cut-off, top/bottom trimming, scraping & buffing.

These edgbanders are now available with pre-milling stations !

2 Stations: end cut-off & top/bottom trimming.
3 Stations: end cut-off, top/bottom trimming, & buffing.

650-A CNC dovetail machine for the small shop !

- Automatic, with 2 NC controlled axis.
- Very easy to change set-up.
- Joints of different heights can be done.

ALFA 21C Classic Classic, 21 spindle horizontal - vertical boring machine

MANUAL SPEED XL Portable edge banding machine

Available for edges
up to 62 mm.

- ABS, PVC, melamine and wood veneer application.
- Can be used in the workshop or on building sites.
- Uses glue from most common manufacturers.
- Variable speed.
