# Introducing **HARDCORE** Solid Granite Table & Fence Systems on Select Steel City Machines.

Table & fences made of solid granite. It makes perfect sense if you think about it. Granite is harder than stainless steel. It absorbs vibration better. It will never rust, spring, twist or warp. It resists scratches and stains. And it provides a seamless, continuous work surface. With other new features including a cabinet saw with a riving knife guard system & jointers with the largest, flattest fence and beds available, you could say we've entered a new era of tool making.
